III. WRITING (10 POINTS)

TASK 1: Complete the following paragraph (Sample).

Digital technology has many benefits for students. First, **it provides instant access to a vast amount of information through the internet, making research much easier. Furthermore, digital tools allow for better organization and collaboration on group projects. Finally, it helps students develop essential 21st-century skills that are required in the modern job market.**

TASK 2: Email to a friend (Sample).

Subject: My experience with AI tools

Hi!

I hope you're doing well. I wanted to tell you about how I've been using AI tools for my school work lately.

On the plus side, AI has been a huge help for brainstorming ideas and explaining complex topics that I didn't quite catch in class. It's like having a personal tutor available 24/7. It really helps me save time on repetitive tasks like organizing my notes.

However, there are some downsides. Sometimes the information it gives isn't 100% accurate, so I always have to double-check the facts. Also, I find it tempting to rely on it too much instead of thinking for myself, which can be a bit dangerous for my own learning.

Overall, it's a great tool if used responsibly. Have you tried any AI apps for your studies?

Talk soon!
